## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of species VII in the reply filed on 1/23/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4 and 5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hauner(US6056916) or Weiller(US2394501), both references previously cited.

Hauner disclosed a contact material for use in switching equipment consisting essentially of 1 to 50 wt. % of iron oxide and Ag as the balance. Weiller disclosed a contact material for use in electric circuit controlling devices consisting essentially of 5 to 15 % iron oxide and Ag as the balance. Neither Hauner nor Weiller disclosed a sealed relay having the claimed performance characteristics, which are established

based on intended use as a matter of design choice. Hauner disclosed the contact material possessed the advantage of greater malleability. Weiller disclosed the contact material possessed the advantages of low tendency to welding, good wear qualities, and a long service life. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ Hauner's or Weiller's contact material in a sealed relay having the claimed performance characteristics for the purpose of providing the advantages of Hauner's or Weiller's contact material.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
